LOK-LOOP

MOTORCYCLE & EQUIPMENT SECURITY "FLOOR ANCHOR"

"Many Motorcycles are stolen each day"

The LOK-LOOP is ideal security for Motorcycles, Quad Bikes, Boats, Jet Skis, Trailers, Caravans, Camp Trailers, Generators, Welders, Compressors and Ride on Lawn Mowers.

Each year over 5000 motorcycles are stolen in Australia. Some stolen and stripped for spare parts, others are untraceable such as off road dirt bikes. For these reasons some insurance companies make it a condition of insurance that a motorcycle be chained up.

- The LOK-LOOP is made from 50mm x 8mm high quality hardened and tempered hacksaw resistant steel.
- The fastener washers have been designed with a tapered design, making grabbing them impossible.
- The fasteners are two 10mm x 75mm anka screws. They are hardened and drill resistant.
  The anka screws are screwed into the concrete, tightened up, then a ball bearing is hammered into the head of the fastener to make them tamper resistant.

The LOK-LOOP comes complete with a 10mm masonry drill bit, 2 Anka Screws and tapered washers, 1 long series 8mm Hex Wrench, 2 ball bearings and fitting instructions. Making installation simple and no additional cost.
